The Benefits

Recognition

...through prominent placement on the SFPE website with mutual web linkage
...through new member announcements in SFPE's newsletter, in releases sent to the SFPE press list, and through announcements to SFPE chapters
... in the front of every issue of SFPE's widely read magazine – *Fire Protection Engineering*
...at the Annual SFPE Awards and Honors Banquet, at the annual SFPE chapter breakfast, and SFPE exhibit booth displays at major industry shows
...through use of the SFPE Corporate 100 Member logo
...through the public receipt of a Corporate 100 plaque demonstrating your support to the fire protection profession

Information & Referrals

...free library copies of SFPE publications
...annual access to the SFPE chapter president contact information
...listing on the referral and recruitment portions of the SFPE website
...referrals from phone inquiries to SFPE

Leadership

...through periodic leadership Summits on issues of concern to the industry

SFPE CORPORATE 100 PROGRAM

Society of Fire Protection Engineers
7315 Wisconsin Avenue, Suite 620E
Bethesda, MD 20814

www.sfpe.org
Tel: 301-718-2910
Fax: 301-718-2242

The History

The Corporate 100 Program was founded in 1976 to provide a vehicle for business organizations to support the mission of SFPE. That early mission has evolved today to “advancing the science and practice of fire protection engineering internationally”.

With the financial support of the Corporate 100 Program and the dedication of both volunteers and staff, SFPE has made great strides in defining and improving the practice of fire protection engineering. SFPE has:

- established and continues to maintain the state licensing examination for fire protection engineers,
- issued three editions of the *Fire Protection Engineering Handbook*,
- developed *Fire Protection Engineering* magazine, *SFPE Journal*, the SFPE Engineering Guide series, and
- provided a comprehensive continuing education program for members and allied professionals.

All of these milestones helped establish fire protection engineering as a distinct, definable discipline and improve the technical capabilities of its practitioners. The financial support and insight from SFPE’s Corporate 100 members are essential to these efforts.

The Members

The current members of the Corporate 100 Program are diverse in their enterprise but share the common vision of the importance of fire protection engineering to the health, safety, and common wellbeing of society.

Membership is not restricted or exclusive but is open to all organizations who wish to support the goals of SFPE. Members include engineering consulting firms, equipment manufacturers, industry associations, insurance companies, and other organizations valuing the accomplishments of SFPE.

Activities of the SFPE Corporate 100 Program

Corporate 100 Forum
Corporate 100 Reception
Recognition in magazine
Notification to members in newsletter
Identification at Exhibits
Premier listing on SFPE website
Recognition at Annual Awards Banquet
Discounts on exhibiting opportunities
Early notification of education opportunities
Networking
Ability to support profession

The Future

SFPE continues to take a leadership role in the recognition and recruitment issues facing the profession today.

SFPE’s mission is to advance the science and practice of fire protection engineering internationally. SFPE task groups are actively developing the technologies and engineering methodologies to support performance-based design: essential tools to ensure fire safety in the 21st century.

SFPE’s technology transfer activities in continuing education and publications are expanding. To succeed in their endeavors, SFPE needs quality staff, capable volunteer leadership, and financial support from a variety of sources. The Corporate 100 Program is an essential source of both financial support and guidance.
